

NORTH DAKOTA WATER EDUCATION FACTS

ND WATER EDUCATION

North Dakota Water Education Program raises awareness and access to practical solutions to water quality issues throughout the state by reaching children, parents, educators, and communities of North Dakota with water education. The program's core beliefs are:

- ▶ Water moves through living and nonliving systems and binds them together in a complex web of life.
- ▶ Water is important for all water users.
- ▶ Sustainable water management is crucial for social and economic stability and a healthy environment.
- ▶ Awareness of and respect for water resources can encourage a personal, lifelong commitment of responsibility and positive community participation.

PROJECT WET

The Project WET program was established in 1984 by the North Dakota State Water Commission in the agency's Planning Division to educate the public about water resources and its management. Based on significant interest from teachers and young adults, the commission focused part of its education efforts on reaching children through teachers and informal educators. Project WET's mission, goal, core beliefs and first activities were created in North Dakota.

**Today, Project WET
Is Offered In
All States 50**
